

PUSH ROD

Quick, safe displacement measurement tool.

The magnetic mount allows quick setup, flexibility, and secure attachment. The sensor provides accurate data, with vibration resistance during testing.

TECHNICAL SPECS

- Measures up to 50mm / 1.97" of Travel
- Accuracy of 0.05mm of Reading
- Universal Magnetic Mounting
- Battery life: 25 hours**

APPLICATIONS

- Steering ball stud wear and tear.
- Component alignment in heavy machinery.
- Wheel loader nose cone wear measurement.
- Bulldozer lift cylinder yoke wear measurement.
