Purpose Built for
Heavy Industry

The **SafeGauge TM Series** enables completely wireless measurement of RPM removing technicians from the live work area while measuring the speed of fans, pumps, drill heads and other rotating machinery components.

This rugged, non-contact laser tachometer is designed to achieve fast, accurate measurements in the harshest mining environments while out of harm's way. Use the MultiTool Pro to capture multiple RPM measurements at the same time.

Packaged in a rugged hard shell carry case, with built-in charging harness, the SafeGauge TM Kit is always ready to go at a moment's notice.

"The SafeGauge products are a great addition to our tooling inventory. Tooling that removes personnel from the footprint of the machine.

The MultiTool Pro allows for easy testing of multiple circuits at the same time. Being able to measure multiple channels at the same time significantly shortens testing duration."
