

**PRESSURE TRANSDUCER**

**Information**

The SafeGauge Pressure Transducer is designed to measure extreme pressures of hydraulic and pneumatic systems in harsh environments.

Live data from up to 7 sensors can safely be monitored from up to 100m (328ft) away.

The rugged case includes inbuilt charging and everything needed to make rapid measurements safely.

**Features**

- 1. Pressure Transducer
- 2. Wireless MultiTool
- 3. Universal Power Supply

SafeTest PT 6 Channel Kit

**Quick Setup**

1. Remove the Pressure Transducer from the kit and unplug the charging cable. The status LED will begin flashing **blue**.
2. Turn on the wireless MultiTool using the switch on the right-hand side.
3. Press the channel programmed for the sensor's serial number. The channel status will change from **Scanning** to **Connected**, and the Pressure Transducer status LED will start flashing **green**.
4. Screw the PT onto the hydraulic system using the 1/4" NPT or accessories.
5. The test page will show the accurate Pressure Transducer reading and min & max pressures.
6. **Difference** can be selected to show the difference in pressure between two sensors.
